

THIRTY-SIXTH

ANNUAL ANNOUNCEMENT

OF THE

Woman's Medical College of Pennsylvania,

NORTH COLLEGE AVENUE AND TWENTY-FIRST STREET,

PHILADELPHIA.

Session of 1885-86.

PHILADELPHIA:

JAS. B. RODGERS PRINTING COMPANY, 52 & 54 N. SIXTH STREET.

1885.

Corporators.

President:

T. MORRIS PEROT.

Secretary:

C. N. PEIRCE.

Treasurer:

ENOCH LEWIS.

JOSEPH JEANES,
REDWOOD F. WARNER,
REBECCA WHITE,
EDWARD LEWIS,
ISRAEL H. JOHNSON,
ALFRED JONES,
MARY JEANES,
SARAH C. F. HALLOWELL,

S. FISHER CORLIES,
EMILY W. TAYLOR,
JAMES A. WRIGHT,
WILLIAM C. SMYTH,
WILLIAM W. JUSTICE,
RACHEL C. BUNTING,
EBEN F. BARKER,
JOSEPH PARRISH,

JOSEPH R. RHOADS.

Executive Committee:

EDWARD LEWIS,

33d Street and Powelton Avenue.

ALFRED JONES,

Ross and Penn Sts., Germantown.

C. N. PEIRCE,

1415 Walnut Street.

ENOCH LEWIS,

2224 Green Street.

REDWOOD F. WARNER,

School Lane, Germantown.

Faculty and Auxiliary Instructors.

RACHEL L. BODLEY, M. D.,
PROFESSOR OF CHEMISTRY AND TOXICOLOGY.

CLARA MARSHALL, M. D.,
PROFESSOR OF MATERIA MEDICA AND GENERAL THERAPEUTICS.

FRANCES EMILY WHITE, M. D.,
PROFESSOR OF PHYSIOLOGY AND HYGIENE.

ANNA E. BROOMALL, M. D.,
PROFESSOR OF OBSTETRICS.

JAMES B. WALKER, M. D.,
PROFESSOR OF THE PRINCIPLES AND PRACTICE OF MEDICINE.

HANNAH T. CROASDALE, M. D.,
PROFESSOR OF DISEASES OF WOMEN AND CHILDREN.

WILLIAM H. PARISH, M. D.,
PROFESSOR OF ANATOMY.

WILLIAM W. KEEN, M. D.,
PROFESSOR OF THE PRINCIPLES AND PRACTICE OF SURGERY.

J GIBBONS HUNT, M. D.
PROFESSOR OF HISTOLOGY AND MICROSCOPY.

C. NEWLIN PEIRCE, D. D. S.,
PROFESSOR OF DENTAL PHYSIOLOGY AND PATHOLOGY.

HORATIO C. WOOD, JR., M. D.,
LECTURER ON SPECIAL SUBJECTS.

EDWARD T. BRUEN, M. D.,
LECTURER ON PATHOLOGY.

JNO. J. REESE, M. D.,
LECTURER ON TOXICOLOGY AND MEDICAL JURISPRUDENCE.

CHARLES K. MILLS, M. D.,
LECTURER ON NERVOUS DISEASES.

HENRY W. STELWAGON, M. D.,
LECTURER ON DERMATOLOGY.

ALEXANDER W. MACCOY, M. D.
LECTURER ON LARYNGOSCOPY AND RHINOSCOPY.

CHARLES H. BURNETT, M. D.,
LECTURER ON OTOTOLOGY.

AMY S. BARTON, M. D.,
LECTURER ON OPHTHALMOLOGY.

ELIZABETH R. BUNDY, M. D.
DEMONSTRATOR OF ANATOMY.

LUCIUS E. SAYRE, PH. G.,
DEMONSTRATOR OF PHARMACY.

HENRY F. FORMAD, M. D.,
DEMONSTRATOR OF PATHOLOGY.

IDA E. RICHARDSON, M. D.,
INSTRUCTOR IN PRACTICE OF MEDICINE.

ANNA M. FULLERTON, M. D.
INSTRUCTOR IN OBSTETRICS.

EMMA V. BOONE, M. D.,
INSTRUCTOR IN GYNÆCOLOGY.

SUSAN P STACKHOUSE, M. D.,
DEMONSTRATOR OF SURGERY.

EMMA E. MUSSON, M. D.,
PROSECTOR AND CURATOR OF THE MUSEUM.

RACHEL L. BODLEY, M. D., Dean,
North College Avenue and 21st Street.

Commencement.

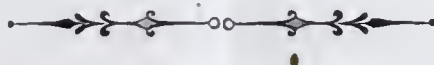

The Thirty-third Annual Commencement was held in the Academy of Music, Wednesday, March 11th, 1885, at 12 M., when the Degree of Doctor of Medicine was conferred by the President, T. MORRIS PEROT, upon the following named ladies, twenty-two in number, after which the Address to the Graduates was delivered by WILLIAM W. KEEN, M. D., Professor of Surgery:

Name.	Residence.	Subject of Thesis.
SALENI ARMSTRONG,	NEBRASKA,	<i>Extra-Uterine Fœtation.</i>
ELLEN C. BRENSINGER,	PENNSYLVANIA,	<i>Cholera Infantum.</i>
LUCY M. CREEMER,	CONNECTICUT,	<i>Physiological Adaptations.</i>
MARY H. CHEYNEY,	PENNSYLVANIA,	<i>Diphtheria.</i>
JULIET E. HANCHETT,	NEW YORK,	<i>Migraine.</i>
IDA J. HEIBERGER,	DISTRICT OF COLUMBIA,	<i>Heredity.</i>
MARY EDITH HENNESSY,	NEW YORK,	<i>The Care of the Aged.</i>
HARRIET A. KANE,	PENNSYLVANIA,	{ <i>The Olfactory Nerve as an Aid to Diagnosis.</i>
CALISTA V. LUTHER,	PENNSYLVANIA,	
KATE McDOWELL,	PENNSYLVANIA,	<i>The Therapeutic Use of Rest.</i>
MARY V. O'CALLAGHAN,	MASSACHUSETTS,	<i>Vaccination.</i>
ELIZABETH L. PECK,	CONNECTICUT,	{ <i>The Influence of Heredity in Ner- vous Diseases.</i>
ANNA M. REYNOLDS,	PENNSYLVANIA,	
CLARA C. SHETTER,	PENNSYLVANIA,	<i>Clinical Observations of Syphilis.</i>
FRANCES COLEMAN-SMITH,	MISSOURI,	<i>Hypertrophic Nasal Catarrh.</i>
IDA M. SHIMER,	PENNSYLVANIA,	<i>Psychical Phases of Epilepsy.</i>
ELIZABETH SNYDER,	PENNSYLVANIA,	<i>The Physiology of Sleep.</i>
ELLA PRENTISS UPHAM,	PENNSYLVANIA,	<i>Cocaine Hydrochlorate.</i>
JENNY G. WAGNER,	PENNSYLVANIA,	<i>Trachelorrhaphy.</i>
ELLA S. WEBB,	NEW YORK,	<i>The Kidney and its Diseases.</i>
EMMA M. WILLIAMS,	PENNSYLVANIA,	{ <i>The Relations of the Vaso-Motors to Disease.</i>
SARAH M. WILBUR,	PENNSYLVANIA,	
	RHODE ISLAND,	<i>The Skin in Health and Disease.</i>
		<i>Puerperal Septicæmia.</i>

ANNOUNCEMENT.

1885.

The WINTER TERM of the THIRTY-SIXTH ANNUAL SESSION of the WOMAN'S MEDICAL COLLEGE OF PENNSYLVANIA will begin on Thursday, October 1st, 1885.

The ANNUAL COMMENCEMENT for conferring the Degree of Doctor of Medicine will be held on Thursday, March 11th, 1886.

The SPRING TERM will begin on Monday, March 15th, and close Friday, May 21st, 1886.

The Collegiate year, lengthened in the year 1871, by the addition of a Spring Term, covers a period of about eight months. The course of instruction is progressive, requiring three years' attendance upon College lectures and practical work.

First Year: Students are expected to attend, during their first winter in College, the lectures on Chemistry, Anatomy, Physiology, Histology, Materia Medica and General Therapeutics, and one other branch, the choice of which is left to the student; to dissect one or two of the usual divisions of the cadaver, to attend the daily clinics of the Woman's Hospital and the weekly examinations in Chemistry, Anatomy and Physiology.

All students are examined at the end of their first winter term, on the lectures upon Inorganic Chemistry, in Anatomy on the Osseous system and the Articulations, and in Physiology on the first half of the course.*

During the first Spring Term, work is required in the Chemical, Physiological and Histological Laboratories, with attendance upon the Spring

* Admission to the Chemical and Physiological Laboratories during the Spring Term depends on the degree of proficiency shown in these examinations.

course of lectures and the Clinics of the Woman's Hospital: the study of practical Anatomy may also be continued.

Second Year: During the second Winter Term, attendance upon all the required lectures of the course is necessary, with the exception of Materia Medica and General Therapeutics and the optional branch, provided these have been included in the studies of the first Winter; also attendance upon the weekly examinations in Chemistry, Anatomy and Physiology, with completion of the required work in practical anatomy and attendance upon clinics. At the close of their second Winter Term, students are eligible for final examination in Chemistry, Anatomy and Physiology, provided they have fulfilled the requirements of the College as stated on page 16, so far as these requirements relate to the three departments mentioned.

During the second Spring Term, work in the Pharmaceutical and Pathological laboratories, and a course in bandaging and fracture-dressing are required, with attendance upon such of the Spring courses of lectures as have not been included in the studies of the first Spring Term.

Students are also recommended to secure, during this term, such private courses of instruction in Physical Diagnosis, Operative Obstetrics, Gynæcology, etc., as their time and means will allow.

At the end of the second Spring Term, a re-examination is allowed to those students who have failed in March, together with such as may have required a part of the work of this term in order to eligibility for examination; and the student must have passed the examinations in at least two branches, in order to be considered eligible in the following winter, for the work of the third Winter Term and final examination in the remaining branches, as a candidate for the degree of Doctor of Medicine.

Third Year: During the third Winter Term, attendance upon lectures and weekly examinations in all the branches in which a final examination has not already been passed, is required; also the course in Operative Surgery.

In addition to the daily clinics at the Woman's Hospital, opportunity is afforded, during both the second and third years, for attendance upon

clinics in all departments of medicine and surgery in the various large Hospitals of Philadelphia.

Four Years' Course : While a three years' course fulfills the absolute requirements of the College, the Faculty earnestly recommend a four years' course of study, with a still further division of the final examinations. In this case, the labors of the second year may be lightened by the omission of lectures in those branches in which final examinations are to be passed at the end of the fourth year, the plan of study being substantially as follows:

First year: Attendance upon lectures in Chemistry, Anatomy, Physiology and Histology with practical anatomy, clinics and laboratory work, as in a three years' course.

Second year: The same as the first year with the addition of Materia Medica and General Therapeutics, and one other branch, the choice of which is left to the student, with laboratory work, clinics, etc., and final examinations in Chemistry, Anatomy and Physiology.

Third year: Attendance upon lectures in the five remaining branches and upon clinics, with final examinations in two of these branches, provided the examinations in Chemistry, Anatomy and Physiology have already been successfully passed.

Fourth year: Attendance upon lectures and clinics with final examination in the three remaining branches.

This plan, which has always proved satisfactory to such as have adopted it, gives time for additional clinical and other study outside the required curriculum, and secures a far more thorough acquaintance with the various subjects of medical study, than is possible in a three years' course.

Weekly examinations on the subjects presented in the lectures of the various Professors, are given by regularly appointed instructors throughout the entire winter course.* These examinations constitute a part of the College Preceptorship† and are free to every student.

* The weekly examinations in Physiology are given by the Professor of Physiology.

† See Page 12.

Women intending to pursue the study of Medicine in this College, are urgently advised to secure a thorough preparatory education, which shall include some knowledge of Botany, Chemistry, Physics and Latin.

ORDER OF LECTURES, CLINICS AND EXAMINATIONS UPON LECTURES, DURING WINTER TERM, SESSION OF 1884-85.

Hours.	Monday.	Tuesday.	Wednesday.	Thursday.	Friday.	Saturday.
9 A. M.		Chemistry, Prof. BODLEY.	Obstetrical and Gynæcological Clinic, Philadelphia Hospital.	Chemistry, Prof. BODLEY.	Chemistry, Prof. BODLEY.	Obstetrical and Gynæcological Clinic, Philadelphia Hospital.

Practical Anatomy,
(Demonstrator's Hours), { Mondays, Tuesdays, Wednesdays and Fridays, 8 to 10 P. M.
Wednesdays and Saturdays, 9 to 12 A. M.
Thursdays, 8½ to 10 P. M.

SPRING TERM.

The Spring Term is mainly devoted to laboratory work and to demonstrative and clinical teaching; lectures are, however, given in several special departments of medicine not provided for in the established curriculum of the Winter. During the Spring of 1885, the following lectures were given:

A course on Dental Physiology and Pathology by Professor C. Newlin Peirce, of the Pennsylvania College of Dental Surgery. These lectures on dentition and the most frequent surgical diseases of the gums and teeth are illustrated by clinical patients from the Woman's Hospital, and are believed to be especially useful to the general practitioner.

A course on Toxicology by Dr. Jno. J. Reese, Professor of Medical Jurisprudence and Toxicology, in the University of Pennsylvania.

A course on Electro-Therapeutics by Dr. Charles K. Mills, Neurologist to the Philadelphia Hospital, and Professor of Diseases of the Mind and Nervous System in the Philadelphia Polyclinic.

Lectures on Mental Diseases by Prof. H. C. Wood of the University of Pennsylvania.

Lectures on Hygiene, and on the Surgery of the air-passages by the Professors in these departments.

The following special courses of clinical lectures were also given:

A course on Laryngoscopy and Rhinoscopy by Dr. Alexander W. MacCoy, of the Dispensary for Diseases of the Throat, in Jefferson College Hospital.

A course on Diseases of the Skin by Dr. Henry W. Stelwagon, Chief of the Dispensary for Skin Diseases in the Hospital of the University of Pennsylvania.

A course on Diseases of the Ear by Dr. Charles H. Burnett, Professor of Otology in the Philadelphia Polyclinic.

A course on Diseases of the Eye by Dr. Amy S. Barton, Ophthalmologist to the Woman's Hospital.

There were given also a practical course in bandaging and fracture dressings; practical instructions in Obstetrics; and demonstrations, both in the College and at the Philadelphia Hospital, of the proper method of making post-mortem examinations.

In addition to the advantages provided by the College, opportunities may be secured during the Spring for private courses of instruction in Physical Diagnosis, Operative Obstetrics, Gynæcology, Ophthalmology, Dermatology, etc.

Laboratories.

The Chemical Laboratory, completely furnished in all its details, is under the supervision of the Professor of Chemistry. Courses in toxicological analysis, and in analysis of the urine (qualitative and quantitative), supplement careful instructions in general qualitative analysis.

The Histological Laboratory, well supplied with microscopes, is under the immediate supervision of the Professor of Histology.

The Physiological Laboratory is in charge of the Professor in that department. It is furnished with a pendulum myograph, a revolving kymograph, a high resistance galvanometer and shunt, a mercurial manometer, a sphygmograph and other necessary apparatus for illustrating some of the most interesting and important problems of Physiology; also with conveniences for the practical study of physiological chemistry.

The Pharmaceutical Laboratory is in charge of a skilled pharmacist, and provides excellent facilities to the student, for becoming familiar with the most important of the standard medicinal preparations.

The Pathological Laboratory, for the study of Pathological Histology, is under the direction of Dr. Henry F. Formad, Demonstrator of Pathology in the University of Pennsylvania. It is furnished with microscopes and all the apparatus required for efficient study and work in this department.

Bandaging, the application of Fracture-dressings and Operative Surgery are taught by the Demonstrator of Surgery on the manikin and cadaver.

The various laboratories are open for work during the Spring Term.

The Dissecting-room is open throughout the entire collegiate year.

All the instruction in the Spring Course is free to every matriculate of the College who has paid for two or more tickets of the preceding Winter Course. To those who have not attended that course, a fee of twenty-five dollars is charged, which sum is deducted from the price of the Winter tickets, if taken within the two following years.

*This sum of twenty-five dollars does not include the price of the Practical Anatomy ticket, if taken. There is also a charge of ten dollars in the Chemical, and of five, in the Pharmaceutical, Physiological, and Pathological Laboratories each, and in the course on Operative Surgery, to cover the cost of material and other expenses attendant upon such work.**

The study of Practical Anatomy also involves an expense for material of about three dollars for each part dissected.

*These prices are to under-graduates only. To all others the charge is ten dollars in each laboratory.

SCHEDULE OF SPRING TERM, 1885.

Hours.	Monday.	Tuesday.	Wednesday.	Thursday.	Friday.	Saturday.
9.30 A.M.	Chemical Laboratory. Prof. BODLEY.	Chemical Laboratory. Prof. BODLEY.	Obstet. and Gyn-æcol. Clinic. Phila. Hospital.	Chemical Laboratory. Prof. BODLEY.	Physiological Laboratory. Prof. WHITE.	Obstet. & Gyn-æcol. Clinic. Phila. Hospital

Bandaging and Fracture Dressing. Dr. STACKHOUSE	Toxicology. Prof. REESE.	Practical Instruction in Obstetrics. Dr. FULLERTON.	

Practical Anatomy, Demonstrator's Hours: { Tuesdays and Fridays, 3 to 5.
Wednesdays and Saturdays, 9 to 1.

Clinical Advantages.

The grounds of the Woman's Hospital, where over four thousand patients are treated annually, adjoin those of the College. The daily

dispensary service of this Hospital is open to the students under proper restrictions.

The Amphitheatre in connection with the Hospital, has a seating capacity of about three hundred, affording ample accommodation for the increasing number of students in attendance upon the clinical lectures of this hospital.

The building also provides a number of smaller rooms, thus admitting of a systematic classification of patients in attendance upon the daily dispensary service, and their treatment by the various attendants in the different departments of medicine and surgery at the same hours.

Weekly clinics in the various departments are held by the different members of the attending staff. Although the departments of obstetrics and gynæcology are specially rich in clinical material, those of medicine and surgery are well provided for.

The students of this College are admitted to clinical lectures at the Pennsylvania and the Philadelphia (Blockley) Hospitals, and by private arrangement classes may obtain instruction in the wards of the latter hospital, which offer rare opportunities for clinical study.

The daily clinics at Wills' Hospital for Diseases of the Eye, at the Eye and Ear Department of the Philadelphia Dispensary, at the German Hospital, and at the Orthopædic Hospital and Infirmary for Nervous Diseases, are all accessible.

The Philadelphia Lying-in Charity also affords advantages to students of this College.

College Preceptorship.

This embraces, for a single year of preceptorship, attendance on the weekly examinations during the Winter Term, attendance on the Spring Term, and on the clinics as provided for in the schedule.

Without additional fees, this plan secures to the student teaching by a number of special instructors, and is believed by the Faculty, after a trial of several years, to constitute a valuable addition to the educational facilities provided for the students of the College, and is offered as a substitute for the supervision of a private practitioner. Private preceptorship is, however, accepted, in which case evidence is required, before conferring the degree, that *three calendar years* have been spent in medical study, no abatement being made in the requirements of the College.*

* See requirements for graduation, p. 16.

Reading-Room.

The Reading-room is supplied with important books of reference, and with medical and other journals. This room is open to students at all hours. Every student on registering at the opening of the year, is required to pay a tax of fifty cents towards providing the room with current medical literature.

Libraries.

The library of the College, as well as that of the Alumnae Association, has received important additions during the last year. It is mostly made up of standard works, valuable for reference.

The library of the Pennsylvania Hospital becomes available to all students registered as clinical attendants in that institution, on a temporary deposit of ten dollars with the Librarian, and the payment of three dollars annually.

The Library of the College of Physicians (the largest in this country excepting that of the Surgeon General's office of the U. S. Army,) is courteously open to students on introduction by any Fellow of the College.

There is also a Medical Department in the Mercantile Library.

Museums.

The College possesses an excellent Museum of specimens both wet and dry, anatomical, pathological and microscopical preparations, models, drawings, etc. This Museum is freely open to students for study.

It is exceedingly desirable that it be steadily increased and the Alumnae are specially invited to send to it any specimens which they may be able to procure. These will be suitably mounted and labeled with the name of the donor.

There is also a fine cabinet of specimens of *materia medica*.

Alumnae Association.

An association of the Alumnae of the College was organized in 1875. One of the expressed objects of this Association is to promote the interests of the institution. No higher encouragement could be afforded the Corporators and Faculty than this expression of continued interest on the part of the graduates; and it is their hope that the organization may prove an advantage to the Alumnae as well as to the College, by aiding them in their efforts to maintain a high standard of attainments and professional character.

At the third annual meeting of this Association, it was determined to apply yearly one half of the surplus funds to the founding of a medical and scientific library, for the use of the students and alumnæ of the College; the other half to the establishment of an educational fund to be used in the interests of students as the Association may at any time direct.*

Scholarships.

There are now in the gift of the Board of Corporators several Free Scholarships, founded and endowed by Ann Preston, M. D., Robert J. Dodd, M. D., Hannah W. Richardson and Isaiah V. Williamson, all faithful friends of the College, the three first named now deceased.

The value of each of these Scholarships is \$240 per annum for the first and second years, and \$120 for the third year; they are available to well educated and deserving young women, between the ages of twenty and thirty, whose means will not enable them to study medicine unassisted.

Three of these Scholarships are now vacant, and the Executive Committee of the College is authorized at its discretion to award them.

Applications for the above mentioned Scholarships should be made in the hand-writing of the applicant, and addressed to Alfred Jones, Secretary of the Committee, Boston Highlands, Mass. They must be forwarded before June 15th, accompanied by the fullest testimonials as to educational qualifications, moral chaarcter and want of means. Successful candidates will be notified at least two months before the opening of the session.

Hospital Appointments.

Five graduates are appointed annually on the basis of a competitive examination to serve as assistants to the Resident Physician in the Woman's Hospital of Philadelphia. The large out-practice connected with this Institution is mainly in charge of these assistants.

The New England Hospital for Women and Children, in Boston, Mass., makes six annual appointments from among the graduates of the various medical schools for women.

The Nursery and Child's Hospital of Staten Island, makes two appointments annually, usually from among the graduates and matriculates of this college. It has a large lying-in department, and affords special opportunities for the study of children's diseases.

* Fifty dollars for improved tables in the Physiological Laboratory were recently contributed by a member of this Association.

The competitive examinations for the position of *interne* in the Philadelphia (Blockley) Hospital were opened to women in 1883. One of the graduates of this College served as *interne* there during the year 1883, and another during 1884. Two out of the whole number of annual appointees may be women.

Premiums.

The Board of Managers of the Woman's Hospital have in charge a fund of one thousand dollars, presented to the Institution by one of their number, the interest of which is offered in small sums as premiums to the graduates and students of this College for inventions or improvements of surgical instruments or medical appliances.*

Special Courses of Study.

Ladies desiring to pursue one or more courses of study as part of a liberal education, with no view to a degree, may matriculate and select a special course without reference to the regular curriculum. Students of Natural History may obtain desirable advantages in the department of Microscopy and Histology.

The Philadelphia Polyclinic and College for Graduates in medicine, offers valuable facilities for a post-graduate course in medical and surgical specialties. The classes are limited in numbers, and the instruction, given in successive courses of six weeks each, is of a purely practical and clinical character.

* During the last year awards of \$25.00 each have been made to Dr. Josephine G. Davis, for the invention of a vapor-bath apparatus, and to Dr. Matilda A. Schultz, for an abdominal support.

REQUIREMENTS FOR GRADUATION.

Candidates for final examination must have reached the age of twenty-one years.

They must have been engaged in the study of medicine for three years, during which time they must have been either private pupils of a respectable practitioner of medicine or Special Students of the College.*

The candidate must have attended three courses of graded instruction including at least two courses of lectures on each of the following subjects, one of which must have been attended in this College:

Chemistry and Toxicology.

Anatomy.

Physiology and Hygiene.

Materia Medica and General Therapeutics.

Principles and Practice of Medicine.

Principles and Practice of Surgery.

Obstetrics.

Gynæcology and Diseases of Children.

The candidate must also have attended one course of lectures on Histology and one on Pathology; must have taken two courses in Practical Anatomy, having made at least one creditable dissection of each of the usual divisions of the cadaver; one course in the Chemical, the Physiological, the Histological, the Pharmaceutical and the Pathological Laboratories, one course in Bandaging and Fracture Dressings and one in Operative Surgery. Satisfactory evidence of having attended at least two courses of clinical lectures in the departments of General Medicine, Surgery, Obstetrics and Gynæcology is also required from each candidate for graduation.

The application for the Degree must be made six weeks before the close of the session. The candidate, at the time of application, must exhibit to the Dean evidence of having complied with the above requirements; she must also present the graduation fee, and a satisfactory thesis of her own composition and penmanship, on some subject which has direct application to medicine. Clinical reports in some one department of medicine will be accepted in lieu of a thesis.

Graduates of other medical schools approved by this, will be admitted to the lectures free of expense, except the cost of the matriculation ticket, unless they should desire to graduate; in which case they will be expected to comply with the terms required of third course students.

The Faculty reserve the right to refuse examination to any applicant on the ground of what they may deem moral or mental unfitness for the profession.

*See College Preceptorship, page 12.

TERMS.

THE FEES ARE AS FOLLOWS:

MATRICULATION TICKET, PAID BUT ONCE	\$ 5 00
PROFESSORS' TICKETS, each \$15.00,	105 00
PRACTICAL ANATOMY TICKET,	10 00
GRADUATION FEE,	30 00
Two tickets only required in each branch.	
Whole cost of two or more courses of Lectures and Graduation, . .	265 00*
Chair of Gynæcology endowed; ticket free.	
No charge for Spring Course except as provided for on page 9.	

Each student must exhibit her tickets to the Dean within the six weeks following the opening of the session.

For the encouragement of capable and well-educated women, whose means will not allow of the usual expenditure, a limited number of students will be admitted annually on the payment of thirty-five dollars for the session—exclusive of matriculation, laboratory and graduation fees, and of the practical anatomy ticket. Such arrangements will be strictly confidential.

Candidates for admission on this basis must forward to the Secretary of the Executive Committee of the Board of Corporators, in care of the Dean of the Faculty, on or before the first of July previous to the opening of the session, an application in their own hand-writing, accompanied by satisfactory testimonials as to character, age, educational qualifications and want of means. The applicant must be not less than twenty, nor more than thirty years of age. The successful candidates will be duly notified.

Special encouragement is offered by the College to women who desire to study medicine with a view to becoming missionary physicians.

Four such students may be admitted annually at half-price of all tickets exclusive of matriculation, laboratory and graduation fees. Each applicant must comply with all the conditions required of other beneficiary students, and furnish in addition the certificate of the Foreign Missionary Society whose ward she is. This must be definite as regards the engagement of the applicant to prosecute medical work abroad, under the direction of the society issuing the certificate, and also must state that she will be assisted pecuniarily by the society in obtaining her medical education. Applications should be sent to the Secretary of the Executive Committee, in care of the Dean of the Faculty.

*This does not include laboratory and other incidental expenses.—See page 10.

Educational qualifications of a high order are among the conditions essential to success in competing for any of the *beneficiary favors* or *scholarships* in the gift of this College, and every applicant is expected to furnish evidence upon this point satisfactory to the Executive Committee, or to undergo a preliminary examination.

Board can be obtained at a convenient distance from the College, for prices varying from \$4.00 to \$7.00 per week.

Total,			398

* Deceased.

NOTE.—The first class consisting of eight members, was graduated from this College at the close of the second college session, *December thirtieth, 1851*.

As the date 1851 is calculated to mislead, and as the second class was not graduated until January 27th, 1853, (close of third college session), the year of graduation of the first class, with this explanation, is given in the foregoing Catalogue as 1852.

WOMAN'S MEDICAL COLLEGE OF PENNSYLVANIA.
